

Research Assistant - Learning Science

Reports to: Senior Research Assistant (Learning Science)

Duration: 1 year (extendable)

Vacancy: 3

Pay: Rs. 50,000 to 75,000 per month

Role Summary:

Research Assistants in the Learning Science track will support the planning, execution, and analysis of classroom pilots. They will be responsible for on-the-ground data collection, survey administration, classroom observations, and preliminary data analysis.

Key Responsibilities:

- Assist in administering pre-tests, post-tests, and surveys in pilot classrooms.
- Conduct structured classroom observations and document findings using standardized protocols.
- Enter, clean, and organize field data (test scores, survey responses, observational notes).
- Support the coding of qualitative data from interviews and open-ended survey responses.
- Coordinate logistics with schools, including scheduling, device setup, and teacher briefings.
- Assist in literature reviews on learning outcome measurement and EdTech impact assessment.
- Contribute to progress reports and data summaries for the project team.

Qualifications:

- Bachelor's or Master's degree (ongoing or completed) in Education, Psychology, Social Sciences, or a related field.
- Any non-engineering UG requires 5 yrs of experience.
- Interest in educational technology, learning sciences, or classroom-based research.
- Basic familiarity with survey tools and data entry/cleaning.
- Strong interpersonal skills for interacting with teachers, students, and school administrators.
- Willingness to travel to school sites for data collection.
- Prior fieldwork or research assistance experience is a plus.
